WORK EXPERIENCE

Straumann Group — **September, 2023 – Present**

Software Engineer - Java — ***Bengaluru, Karnataka, IN***

- Took end-to-end ownership of the enterprise authentication platform, driving development, enhancement, and production support for Azure AD B2C, Azure AD B2C Custom Policies, Azure App Registrations, login services, and user data services.
- Designed and delivered customer-facing backend services, modernized legacy applications, and contributed to developing an event-driven SAP synchronization solution using Azure Service Bus, replacing a 14-hour daily batch process with real-time updates.
- Introduced, designed, and implemented a Redis-based session management solution, leading its delivery from concept to production and improving session scalability, security, and user experience across authentication services.
- Led production incident troubleshooting, root-cause analysis, and platform improvements, improving service maintainability and earning the **Certificate of Appreciation – Taking Ownership in 2024 and 2025** for exceptional technical ownership.

Yell — **February, 2022 – August, 2023**

Software Engineer - Java — ***Reading, England, UK***

- Developed and maintained backend services across 25+ enterprise microservices, building scalable REST APIs for distributed applications.
- Led large-scale content moderation initiatives by building backend endpoints to detect profanity levels and moderate over 100 million image and text files, improving platform compliance and content quality.
- Designed and configured MarkLogic server infrastructure supporting high-availability production applications across the UK.
- Developed and deployed backend microservices while supporting distributed system integrations and enterprise production releases.

FLAGROOT — **Oct. 2019 - Oct. 2020**

Java Full Stack Intern — ***Bengaluru, Karnataka, IN***

- Carried out numerous projects along with the Java Full Stack Course Training held at JSPIDERS/QSPIDERS.
- Developed ERP Systems with technologies like Java, JDBC, SQL, J2EE, and Basics of HTML and CSS.

SKILLS

- **Languages:** Java
- **Frameworks:** Spring Boot, Spring Security, Microservices, RESTful APIs
- **Security & Identity:** OAuth 2.0, JWT, Azure AD B2C, Azure AD B2C Custom Policies, Azure App Registrations
- **Cloud:** Azure, Azure Service Bus, Azure Key Vault, Azure Pipelines, Azure Application Insights
- **Databases:** PostgreSQL, Redis, MySQL
- **DevOps & Tools:** Docker, Git, Jenkins, Maven, Gradle, Swagger/OpenAPI, Flyway, Postman, Jira
- **Practices & Methodologies:** Agile (Scrum), CI/CD, TDD, Design Patterns, SDLC
- **Core Concepts:** Data Structures & Algorithms

EDUCATION

University of Glasgow — **January, 2021 – January, 2022**

Master of Science (M.Sc.), Information Technology (I.T) — *Glasgow, Scotland, UK*

Reva University — **August, 2014 – August, 2018**

Bachelor of Technology (B. Tech), Electronics and Communication (E.C.E) — *Bengaluru, Karnataka, IN*

PROJECTS

- Development of a Hospital Management System — December, 2021
- IT+ Team Project – Interactive Card Game — July, 2021
- Development of a Test System for Base Band Data Handling System – U.R.S.C/ISRO — April, 2018

CERTIFICATIONS AND AWARDS

- Certificate of Appreciation: Taking Ownership – Straumann Group — 2024 and 2025
- HackerRank: Java (Basic) — December, 2021
- JSPIDERS/QSPIDERS: Full Stack in Java Course Completion Certification — October, 2019 – October, 2020
- Merit Award: 2nd Place – LPSC, ISRO — June, 2012
